The essential feature of the process is the small diameter electrode wire, which is fed continuously into the arc from Introduction To MIG Welding - Weldability Sif Manual MIG/MAG welding is often referred as a semi-automatic process, as the wire feed rate and arc length are controlled by the power source, but the travel speed and wire position are under manual control. The process can also be mechanised when all the process parameters are not directly controlled by a welder, but might still require manual adjustment during welding. When no manual ...
