limited by phylogenetic scale in their application. In practice, however, few morphological characters are shared among major groups of Molecular Versus Morphological Approaches to Systematics Taxonomy, that component of systematics specifically focusing on the theory and practice of classification, is not clearly separable and both are frequently used interchangeably by biologists. This chapter will first briefly review the importance of systematics to the pest management enterprise and then summarize the use of biological characteristics in systematic research. Systematics and Biological Characteristics | Radcliffe's ... This morphological bases of the systematics and phylogeny of the nototheniid fishes, as
